

CAREER INSIGHTS ACADEMY

After College - What's next for your student?

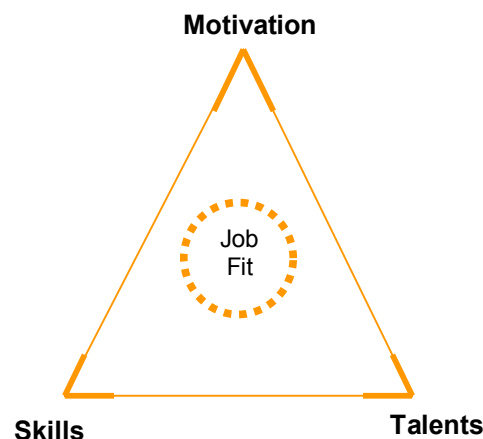

Attention Parents **PROTECT YOUR INVESTMENT**

If you are like other parents we have talked to, you have probably invested significant time and money to launch your child to:

- Go to college
- Graduate
- Start a career

But what if career plans are floundering, putting the launch in jeopardy? What if your student is not confident that a chosen major will lead to a rewarding career, or is about to graduate but isn't sure what job to pursue and how?

Protect Your Investment. Use Our Best Work to help your student get launched on the right path. We are career experts who are specially trained to match a person's intrinsic motivation, natural talents, and acquired skills to a rewarding and satisfying work future – whatever the profession. Don't leave something as important as a career to chance. Invest in one more lesson that will ensure your college student takes the right next step.

At the end of three one-hour sessions with us, students are able to:

- *Align their natural talents and skills with career choices*
- *Know what activities are intrinsically motivating to them and how to apply that knowledge to career choices*
- *Articulate how their talents and skills will benefit a prospective employer when applying for a job*
- *Start their career with confidence knowing "specific career categories" that are a good fit with key skills, talent, and motivation*

**What our clients says:**

"The consulting from Our Best Work provided me with real observable data and tactics... I was able to really "get it!" The possibilities and opportunities are endless!!!" - College student

"It feels so good to be a part of something that is so successful. Where has this been all of my life?" Software developer after finishing her career program and starting a new career path.

"The coaching sessions were absolutely incredible! I can't put into words, the impact it will have for me. Truly "Life Changing"!!!!!"
—Aerospace Engineer
